

Thus, an illustrative elected composition will contain at least one complex comprised of a cobalt nitrate ammine as well as at least one release agent (calcium stearate), as indicated in Applicants' September 30, 1999 Response to Requirement for Restriction. It is thought that the earlier response and this confirmation of same are properly and fully responsive to the Examiner's original paper dated August 31, 1999.

Favorable action on the merits is earnestly requested.

Respectfully submitted,

Pillsbury Madison & Sutro LLP
